

PRADHAN MANTRI JAN AROGYA YOJANA

Context:

Young the volume of Young account for over 49% of Ayushman card subscribers, and they account for over 48% of total authorised hospital admissions under the AB PM-JAY scheme.

About Pradhan Mantri Jan Arogya Yojana:

- > This scheme was launched on 23rd September, 2018 in Ranchi, Jharkhand by the Hon'ble Prime Minister of India, Shri Narendra Modi.
- It is the largest health assurance scheme in the world which aims at providing a health cover of Rs. 5 lakhs per family per year for secondary and tertiary care hospitalization to over 12 crores poor and vulnerable families (approximately 55 crore beneficiaries) that form the bottom 40% of the Indian population.
- The households included are based on the deprivation and occupational criteria of Socio-Economic Caste Census 2011 (SECC 2011) for rural and urban areas respectively.
- > PM-JAY was earlier known as the National Health Protection Scheme (NHPS) before being rechristened.
- It subsumed the then existing Rashtriya Swasthya Bima Yojana (RSBY) which had been launched in 2008. The coverage mentioned under PM-JAY, therefore, also includes families that were covered in RSBY but are not present in the SECC 2011 database.
- PM-JAY is fully funded by the Government and cost of implementation is shared between the Central and State Governments

Key Features of the scheme:

- > PM-JAY is the world's largest health insurance/ assurance scheme fully financed by the government.
- It provides a cover of Rs. 5 lakhs per family per year for secondary and tertiary care hospitalization across public and private empanelled hospitals in India.
- PM-JAY provides cashless access to health care services for the beneficiary at the point of service, that is, the hospital.
- > PM-JAY envisions to help mitigate catastrophic expenditure on medical treatment which pushes nearly 6 crore Indians into poverty each year.
- It covers up to 3 days of pre-hospitalization and 15 days post-hospitalization expenses such as diagnostics and medicines.
- There is no restriction on the family size, age or gender.
- All pre-existing conditions are covered from day one.

Challenges of the scheme:

- It aims to ensure access to quality essential healthcare services and medicines for populations without exposing them to the risk of financial hardship.
- > Progress towards Universal health care (UHC) must be seen in light of the severe challenges facing the Indian system.
- The country is beset by deficiencies in the resources available to fund healthcare, the skilled workforce and infrastructure available to provide care, and oversight of healthcare provision.
- Private providers have become the dominant provider of care in India, and thus UHC is unlikely to be achieved without engagement with this sector.
- > Regulation and oversight of these providers in low- and middle-income nations is often poor.
- Corruption at all levels of the system from doctor training to investment decisions remains an issue.

Benefit Cover Under PM-JAY:

Pre-hospitalization

Medical examination,

treatment and

consultation

Complications arising during treatment

Post-hospitalization follow-up care up to 15 days.

Conclusion:

The AB-PMJAY offers a unique opportunity to improve the health of hundreds of millions of Indians and eliminate a major source of poverty afflicting the

The success of UHC is measured by the access of health services across the population, the types of services that are available, and the financial protection offered to the population.

Altering these incentives to promote universal and quality care for all Indians will require widespread reform, intervention, and leadership across all levels of the Indian system.

> By providing the impetus for systemic reform, AB-PMJAY presents the nation with a chance to tackle long-term and embedded shortcomings in governance, quality control, and

stewardship.

Significance of the scheme:

It covers all hospitalisation expenses with cashless transactions to beneficiaries. during hospitalisation.

pitalisation.

Any
